Education

BVC College of Engineering & Technology
B.Tech in EEE
AG College of Engineering & Technology
Diploma in EEE

Palacherla
June 2016 - May-2019

Tadapalligudem
July-2012 - May-2015

Career Summary

- Driven achiever with over 3 years of progressive experience in information technology consulting, specializing in Web-based and client/server-based applications, as well as custom development projects.
- Committed and self-motivated professional adept at managing multiple tasks in high-pressure environments.
- Proficient communicator with exceptional team-building skills. Capable problem-solver equipped to design solutions and support developers with challenges.
- Innovative thinker and analytical problem-solver with a proven ability to oversee projects from inception to completion within fast-paced, time-sensitive environments. Enforced high engineering standards and reusable code practices, reducing code maintenance time by 20%.
- Configured 20+ POCs for prototype demo.
- Conducted 50+ code reviews and 200+ unit tests, ensuring a 95% success rate in project deliveries.
- I honed my Innoveo skills and worked on several projects using my expertise.

Skill Summary

Certifications: Innoveo Business Analyst & Architect

Languages: Python

Tools: MySQL, Jira, Postman, SourceTree, TeamCity, GreyLog, Putty, GitLab, Jira, AI Tools

Good at: Java Script, HTML, CSS, Documentation, and Presentations

Work Experience

Zurich Individual Accident | May 2023 - Present

Innoveo Developer

- ZNA has customized Accident and Health (A&H) products for employers and other groups.
- Individual Accident is an individual AD&D product with many riders that can help cover the costs of healthcare and other miscellaneous expenses that may not be covered by other insurance. The Individual Accident Product is intended to serve the needs of individuals who do not have access to group accident plans through their employers.
- The organization's strategic primary objective was to fill the coverage gaps left by traditional insurance, catering to specific needs like hospitalization and accidental injury expenses.
- I have experience working with MySQL (Workbench) to send required data downstream and have successfully configured the entire structure downstream in Innoveo.
- I have prepared migration scripts and facilitated deployments from the development to the sit regions. And Involved in Business transactions such as reinstatement and renewal processes.
- Conducted manual unit tests for all user stories.

Zurich Individual Health Indemnity | May 2022 - May 2023

Innoveo Developer

- ZNA has customized Accident and Health (A&H) products for employers and other groups.
- Individual Hospital Indemnity is a supplemental insurance that offers optimism to consumers unable to access this type of coverage through their employer or other groups. Zurich's policy will pay a predefined flat daily amount for a wide range of benefits regardless of the cost incurred. I have worked on the entire rating part to calculate the premiums and select the benefits and benefit level premiums for a given plan.
- Integrated an entire rating structure, and Rider APIs, get data from Index files based on selection.
- Involved in business transactions such as new business, cancellations, and policy change processes.
- Conducted manual unit tests for all user stories.

Metasurance | March 2022 - May 2022

Innoveo Developer

- During the i3i Hackathon, I had the opportunity to showcase my skills in Innoveo. I chose Metasurance, which insures Meta-related products such as NFTs, Avatars, and Virtual Land. I used Innoveo to develop a quote proposal, create policies, and handle the First Notice of Loss (FNOL) process. Additionally, I gathered several datasets for calculating the premiums. developed a Machine learning Algorithm to calculate Premiums.
- Developed AWS lambda function to calculate the premiums.
- Integrated the created lambda function to Innoveo.
- Manual Unit testing

Accident & Health | Jan 2022 - March 2022

Innoveo Developer

- Accident and health benefits are a type of supplemental health insurance policy.
- They provide coverage for non-traditional expenses such as transportation costs and lost income due to time spent recovering from an injury.
- Researched and selected health insurance during Innoveo certification, prepared a comprehensive business flow document, and developed an application for generating quotes, policies, and FNOL processes. Integrated with ZIP Code API, Bitcoin API
- Document Generation (Policy Documents).
- Email Integrations.
- Rest API.
- Premium Calculation
- Manual Unit testing
