

SUMMARY

Results-oriented Software Developer with 3+ years of experience in developing enterprise applications and workflow automation solutions using Microsoft Power Platform. Expertise in Power Apps (Canvas & Model-Driven Apps), Power Automate (Cloud), SharePoint Online, Dataverse, SQL, Office 365 integrations, and report automation. Skilled in designing scalable low-code business applications, automating manual processes, improving operational efficiency, and delivering user-centric solutions. Experienced in requirement gathering, troubleshooting, deployment, and production support in Agile environments.

SKILLS

- Microsoft Power Platform
- Power Apps (Canvas / Model-Driven App)
- Dataverse
- Power Automate (Cloud)
- Office 365 integrations
- SPFx
- React
- Power Query
- SharePoint Online
- SQL
- Power BI Basics / Reporting
- Javascript
- C#
- Git & Github
- Python (basics)

EXPERIENCE

Wipro, Hyderabad | 2023 – Present

- Designed and developed business solutions using Power Apps, Power Automate, and SharePoint Online to automate business processes and improve operational efficiency.
- Developed automation bots using Power Automate Cloud for SharePoint, Office 365, PDF invoice processing, Excel, email automation, and legacy applications.
- Collaborated with business analysts and stakeholders to gather requirements, analyze business processes, and identify automation opportunities.
- Implemented automation workflows for document management, Excel data processing, email notifications, approvals, invoice processing, and report automation.
- Built custom applications using Power Apps (Canvas & Model-Driven Apps) to streamline workflows and enhance user productivity.
- Integrated Power Platform solutions with Office 365, SharePoint Online, SQL, Dataverse, Outlook, Excel, and third-party applications for end-to-end automation.
- Designed responsive and user-friendly Power Apps interfaces with role-based access control and optimized user experience.
- Performed testing, debugging, validation, and deployment of Power Apps and automation workflows across production environments.
- Provided maintenance, troubleshooting, support, and enhancements for deployed Power Platform solutions.
- Prepared technical documentation for applications, workflows, deployments, and support processes for knowledge sharing and future maintenance.
- Worked in Agile teams and participated in requirement discussions, sprint planning, and solution reviews.
- Designed, packaged, and maintained Power Platform solutions (apps, flows, tables, custom connectors), and deployed across environments using CI/CD pipelines, ensuring version control and application lifecycle management (ALM).

- Designed site maps, dashboards, and navigation structures in Model-Driven Apps, enabling intuitive data access and improving user experience..
- Developed SPFx web parts and custom forms using React and Fluent UI, improving user experience and data management.
- Developed a responsive carousel slider in SPFx using React, TypeScript, and Fluent UI to display images and content in SharePoint sites.
- Developed dynamic dashboards using React and Ag-Grid for data visualization with pagination and filtering.
- Integrated Microsoft Copilot capabilities to fetch user profile and contact details, improving information accessibility.
- Leveraged Microsoft Copilot to extract, organize, and generate directory reports, enhancing productivity

CERTIFICATION

PL-900, AZ-900

EDUCATION

Bachelor of Technology AITAM College JNTU University	2018 – 2022
Intermediate Sri Chaitanya Junior College	2016 – 2018
SSC Geethanjali	2016
