Summary

- Experienced Software Engineer with 5 years of expertise in building, modernizing, and optimizing enterprise applications using ASP.NET Core, .NET Framework, .NET 8, .NET 10, React and Angular. Skilled in backend development, RESTful APIs, SQL optimization, Entity Framework, ADO.NET, database-agnostic architectures, AWS services, SSIS, application deployment, debugging, and security remediation, WCF-to-REST API migration, cross-platform database solutions, performance optimization, and application stability improvements. Strong understanding of full-stack development and enterprise application integration.

Experience

- Gainwell Technologies** November 2025 - September 2026
Product Developer
 - Experienced in developing and modernizing enterprise applications, from .NET Framework 4.8 to .NET 10.
 - Migrated data-access operations from Entity Framework to ADO.NET, improving application performance.
 - Refactored legacy systems into database-agnostic architectures supporting SQL Server, Oracle, PostgreSQL, and MySQL.
 - Converted WCF services to RESTful GET APIs and SQL Server stored procedures into ANSI SQL-compliant queries for cross-platform compatibility.
 - Addressed client and internal bugs, Coverity and Acunetix scan issues, and Introduced Home Screen exception handling to improve VUE360 application stability and security.
- Ivy Mobility** Jun 2024 - November 2025
Software Engineer
Development Projects :
 - Automated JSON-to-PDF generation, boosting efficiency and cutting effort by 40%.
 - Created a rule-based EDI tool to automate invoice processing and reduce manual effort and errors.
 - Built OLAP streaming pipelines with AWS, delivering analytics-ready data to Redshift.
 - Designed Incentive UI using DHTMLX Grid with backend validations and structured data flow.
 - Fixed 500+ front-end and back-end SonarQube issues, enhancing application stability.
 - Created complex business reports using stored procedures to improve data visibility and insights.
- Prodapt** Oct 2021 - Jun 2024
Software Engineer
Development Projects :
 - Modernized 8 SMS applications from SMPP to REST API Platform.
 - Upgraded 2 SMS applications from Windows Service to Worker Service (ASP.NET Core).
 - Transformed 2 SMS applications from C++ to C# (ASP.NET Core).
 - Designed grid-view report pages for two applications, improving report accessibility for end users.
 - Developed a production monitoring dashboard with scheduled alerts, reducing response time by 30%.
 - Prepared over 50 SSIS packages and mapped them to SQL jobs to enhance productivity.**Migrations :**
 - Application Migration:** Successfully migrated over 40 applications to 11 new servers while supporting application deployment and post-migration validation.
 - Database and File Server Migration:** Successfully completed the migration of over 40 applications, including databases, files, and over 190 jobs.**Support Project :**
 - Proficiently analyzed, debugged, and Fixed defects in production for over 40 applications.
 - Enhanced application performance by 30% and reduced user complaints by 50% through core feature.

Education

- Aditya College of Engineering** 2018 - 2021
B-Tech
7.2 CGPA

Skills

- Programming Languages: C#, Python ,Java.
- Web Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, TypeScript, Angular, Blazor, React, Kendo UI.
- Backend Technologies: ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, Dapper, ADO.NET, Enterprise Library, LINQ, Worker Service, Windows Service, WCF, Microservices, Swagger.
- Databases: SQL Server, PostgreSQL, MongoDB, ANSISQL.
- Cloud: AWS(S3, SQS, SNS, Lambda, Redshift, CloudWatch).
- Version Control Tools: TFS, GitHub, GitLab.
- Familiar Tools: SSIS, IIS, Visual Studio, VS Code, Postman, SSMS, DBeaver, pgAdmin, DevTools, SonarQube.
- Development Methodologies: Agile(Scrum Framework), SDLC.
- AI-Assisted Development Tools: GitHub Copilot, Codex.

Projects

• Cricketers-Score-CRUD-Application

- Developed a full stack web application using Angular 18 and ASP.NET Core 8 Web API with SQL Server, Built CRUD operations, routing, forms, and RESTful API integration using Angular and Web API.

URL:<https://github.com/josephkranthi/CricketersScore>

• Full-Stack-Task-Manager-App

- Engineered a full-stack Task Management CRUD application using React frontend, ASP.NET Core Web API backend, and MongoDB database, enabling users to create, update, delete, and track task completion.

URL: <https://github.com/josephkranthi/Full-Stack-Task-Manager-App>

• Image-Management-with-MVC-Core & Web-Sites

- Implemented image management in ASP.NET Core MVC with CRUD operations on database and local storage, improving efficiency by 40%.
- Crafted sample websites covering diverse topics such as fries, life, JSON file conversion, and nature.

URL:<https://github.com/josephkranthi/Image-Management-with-MVC-Core>

Achievements & Awards

- Received 'Rising Rookie' Award for exceptional first-year performance.
- Resolved client issues efficiently, reducing turnaround time and earning two 'Shout Awards'.

Certifications

- Coursera Certification on Python.
- ITIL 4 Foundation Certification completed.
- Udemy Certification on ASP.NET Core 6, Entity Framework, ASP.Net Core Web API, JAVA, SQL,SSIS,IIS, Typescript, Postman API Testing &Dev Tools.
- Skillsoft certification on React.
