

TUMMURI SOWJANYA

Manual QA Engineer — API Testing — End-to-End Testing — Agile Scrum — Selenium WebDriver
sowjanyaummuri06@gmail.com — +91-8019633604 — [LinkedIn](#)

Professional Summary

Results-driven QA Engineer with 2+ years of experience in Manual Testing of web and mobile applications within Agile environments. Skilled in Functional Testing, Regression Testing, Integration Testing, Exploratory Testing, API Testing, and End-to-End Validation. Experienced in REST API testing using Postman, backend validation using SQL, defect lifecycle management, release testing, and quality assurance processes. Hands-on experience with Selenium WebDriver, Java, and TestNG. Proficient in AI-assisted testing techniques including test case generation, requirement analysis, defect investigation, documentation support, and productivity optimization.

Technical Skills

- **Testing:** Manual Testing, Functional Testing, Regression Testing, Integration Testing, Exploratory Testing, Smoke Testing, Sanity Testing, End-to-End Testing, Cross-Browser Testing, Mobile Testing, API Testing, UAT Support
- **Automation:** Selenium WebDriver, TestNG, Maven, Page Object Model (POM)
- **Tools:** Postman, JIRA, TestRail, MTT
- **Programming:** Java, SQL
- **Web Technologies:** HTML, CSS
- **Methodologies:** Agile Scrum, SDLC, STLC, Defect Lifecycle Management, Test Case Design, Root Cause Analysis
- **AI-Assisted Testing:** AI-based Test Case Generation, Requirement Analysis, Defect Investigation, Test Documentation, Test Data Preparation

Professional Experience

QA Test Engineer

Aug 2024 – Present

Tech Mahindra

Ahmedabad, India

- Designed and executed 250+ test cases covering Functional, Regression, Integration, Exploratory, API, and End-to-End testing scenarios across web and mobile applications.
- Performed REST API testing using Postman to validate request-response behavior, backend integrations, and data consistency.
- Executed backend data validation using SQL queries to verify business workflows and database integrity.
- Reduced escaped defects by approximately 20% through improved regression coverage and early defect identification.
- Supported production deployment validation and release readiness activities.
- Participated in Agile ceremonies including Sprint Planning, Daily Standups, Backlog Grooming, and Retrospectives.
- Collaborated with developers, business analysts, and product teams to ensure timely defect resolution and quality deliverables.
- Created test execution reports, quality metrics dashboards, and release status reports.
- Built Selenium WebDriver automation scripts using Java and TestNG.
- Utilized AI-powered tools such as ChatGPT and internal AI solutions for test scenario generation, requirement analysis, SQL query assistance, defect investigation, and test documentation, improving productivity and testing efficiency.

Project Experience

Client: Meta

Domain: Social Media, Advertising Technology (Ads), Business & Commerce Platforms

- **Media & Consumer Applications (Web & Mobile)**

- Executed end-to-end testing of large-scale consumer applications across web and mobile platforms.
- Performed functional, regression, cross-browser, cross-device, accessibility, and usability testing.
- Improved overall user experience consistency and platform compatibility confidence by approximately 20%.

- **Marketplace & Payments (Commerce Ecosystem)**

- Validated marketplace and commerce workflows including product discovery, shopping cart, checkout, payment integrations, refunds, and order lifecycle management.
- Ensured reliability, security, and seamless transaction processing across business-critical workflows.
- Contributed to improving transaction success rates by approximately 15%.

- **Ads & Monetization Features**

- Conducted A/B testing validation for advertising and monetization features.
- Validated ad creation, targeting, delivery, reporting, and analytics workflows.
- Verified UI consistency, experiment configurations, and reporting accuracy across multiple releases.
- Improved validation accuracy of ad delivery and experimentation workflows by approximately 12%.

- **Privacy & Data Protection (Trust & Compliance)**

- Executed end-to-end testing of privacy and data protection workflows.
- Validated user consent management, access controls, data visibility restrictions, and retention policies.
- Supported compliance with privacy and trust & safety requirements.
- Strengthened data compliance adherence by approximately 20%.

- **Content Integrity, Hyperlinks & Help Center**

- Validated content accuracy, hyperlink functionality, FAQ modules, and Help Center workflows.
- Performed accessibility and usability testing to ensure consistent user experiences.
- Improved self-service efficiency and user engagement by approximately 18%.

- **Quality Ownership & Cross-Functional Collaboration**

- Collaborated with Product Managers, Developers, Designers, and Global QA teams during requirement reviews and test planning.
- Participated in risk assessments and contributed to defining testing strategies.
- Improved cross-team defect resolution efficiency by approximately 25%.

- **Test Execution, Defect Management & Reporting**

- Planned and executed test cycles, regression suites, and release validation activities.
- Managed complete defect lifecycle including defect logging, retesting, validation, and closure.
- Delivered quality metrics, release-readiness reports, and testing status dashboards.
- Contributed to a 15% reduction in post-release defects.

Key Responsibilities

- Served as a QA point of contact for assigned testing activities and collaborated with cross-functional teams.
- Coordinated testing efforts across multiple workstreams while maintaining quality standards and delivery timelines.
- Executed end-to-end test cycles for new features, enhancements, and production releases.
- Maintained detailed defect logs and tracked issues through resolution using defect management tools.

- Delivered daily, weekly, and monthly QA status reports to stakeholders.
- Consistently met release deadlines in fast-paced Agile environments.
- Validated A/B testing experiments for functionality, UI consistency, and targeting logic.
- Collaborated with development teams to improve feature quality and release stability.
- Conducted visual audits and UI verification using screenshots and design specifications.
- Utilized AI-assisted tools to accelerate test design, requirement understanding, defect analysis, and documentation activities.

Automation Project

Selenium Automation Framework

- Automated login workflows and critical business scenarios using Selenium WebDriver and TestNG.
- Implemented Page Object Model (POM) framework design for maintainability and reusability.
- Worked extensively with element locators, synchronization techniques, explicit waits, implicit waits, and framework configuration.
- Executed automated test suites and analyzed execution reports to identify defects and improve test coverage.

Education

Kakinada Institute of Engineering and Technology	Kakinada, India
Bachelor of Technology (B.Tech) – Electronics and Communication Engineering	2019 – 2023
Vidya Vikas Junior College	Eluru, India
Intermediate (MPC)	2017 – 2019

Awards & Achievements

- Received **Bravo Award** at Tech Mahindra for outstanding quality contribution, ownership, and collaboration.
- Reduced production defect leakage by approximately 20% through targeted regression testing strategies.
- Improved testing efficiency through reusable test assets and structured test documentation.
- Strengthened API and backend validation processes to improve data reliability and workflow accuracy.
- Actively adopted AI-assisted testing practices to improve productivity and accelerate QA deliverables.
